20th

Certification Body for Sustainability Management.
SPEC will be in cooperation with your company.

Since 1998

CEO greetings

We will be a successful business partner
as a certification body for sustainable management.

20 Years of Trust

The 20th anniversary of **SPEC's** establishment means **trust**.

The **ISO management system certification** with SPEC will be the **cornerstone** of **sustainable management** beyond the purpose of certification itself.

SPEC is **Korea Accreditation Board (KAB) accredited certification body established in 1998** with a focus on Professional Engineers under the National Technical Qualification Act.

SPEC is certified for **Quality (ISO 9001), Environmental (ISO 14001), Occupational Safety and Health (ISO 45001), Food Safety (ISO 22000) and Anti-Bribery (ISO 37001) management system**. We pursue the value of corporate **sustainability, effectiveness and efficiency** of management through **risk-based thinking**.

Beyond Korea and Asia

SPEC's ISO management system certification services are available **throughout Asia**.

Founded in 2014, **SPEC VINA** is helping to establish a management system for Korean companies in **Hanoi** and **Ho Chi Minh City**, Vietnam.

Korean resident staff and Vietnamese auditors who can speak Korean work hard to provide smooth service.

SPEC will lead the **systemization of management**. The time to measure success based on the capabilities of a specific person has passed.

The purpose of the ISO management system is not to certification, but to systemize and clarify responsibilities and ensure that processes and results are transparently evaluated. To this end, **e-ISO website (www.eiso.co.kr)** is operated so that knowledge and information can be distributed continuously for 24 hours.

SPEC, an **accredited training institution of EXEMPLAR GLOBAL**, will take the lead in spreading advanced management system through training of competent **international certification auditor** and **training of internal auditor**.

Corporate **social responsibility** grows. In order to achieve **economic prosperity, environmental protection** and **social justice** of customers, SPEC will become a **trustworthy management system certification and training institution**.

Thank you.

SPEC CEO Yeun Sung Kim

“More than Certification” is provided by SPEC.

SPEC has been leading the way for strengthening the competitiveness of the countries and companies through 20-year management system certification.

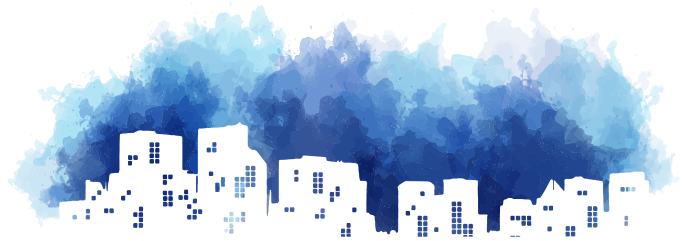

Professional Engineers with the highest level of expertise and practical experience in certification systems are together for the development of the country and the company.

We will be a successful business partner who will come up with solutions and core for your company growth and development.

Environmental Management System

ISO 45001
Safety and Health Management System

ISO 37001
Anti-Bribery Management System

ISO 22000
Food safety management system

ISO 13485
Medical Device Management System

ISO 27001
Information security management system

IATF 16949
Automobile industry quality management system

Training

SPEC develops and provides training courses necessary for the management system.

Training Plan and Training Application

Training Program

economical cost, high efficiency !

through employment insurance reimbursement process training

Certification Auditor Training

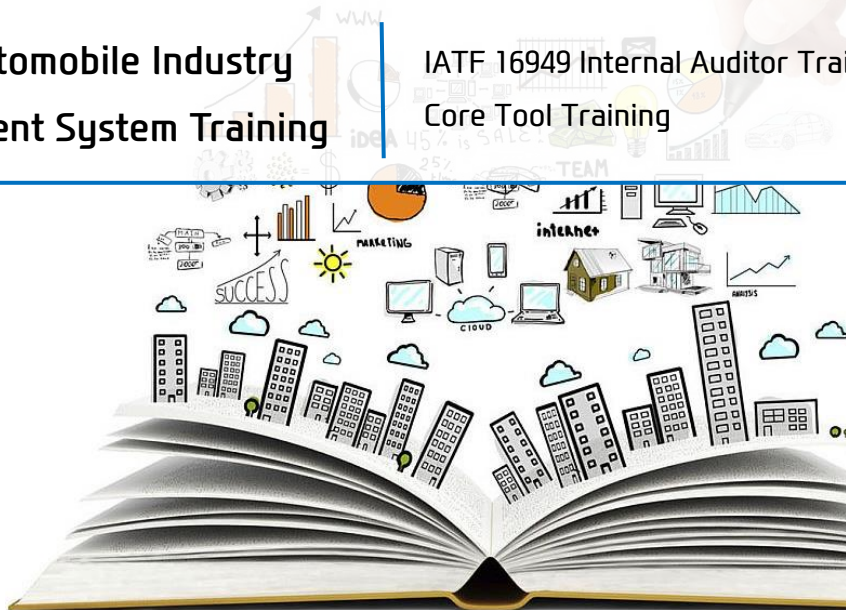

- QMS Certification Auditor
- EMS Certification Auditor
- OHSMS Certification Auditor
- ABMS Certification Auditor
- ISO Lead Auditor (AU/TL)

Management System Training

- Quality / Environment Internal Auditor Course
- Corporate Custom in-house Training
- System Transition Training
- Quality Control Comprehensive Practice

IATF Automobile Industry Management System Training

- IATF 16949 Internal Auditor Training
- Core Tool Training

Training and Software Distribution

SPEC training is associated with Exemplar Global, which is known worldwide as an auditor registration authority

Exemplar Global course

- Lead Auditor Course (QMS, EMS, OHSAS, ABMS)
- Internal Auditor Course

1. Provide ISO personnel with professional training opportunities in management systems
2. Improved credibility through Exemplar Global formal registration process
3. Operate curriculum based on role play and field situation

Sigma XL

Powerful! Familiar with the user!
The price is cheap!

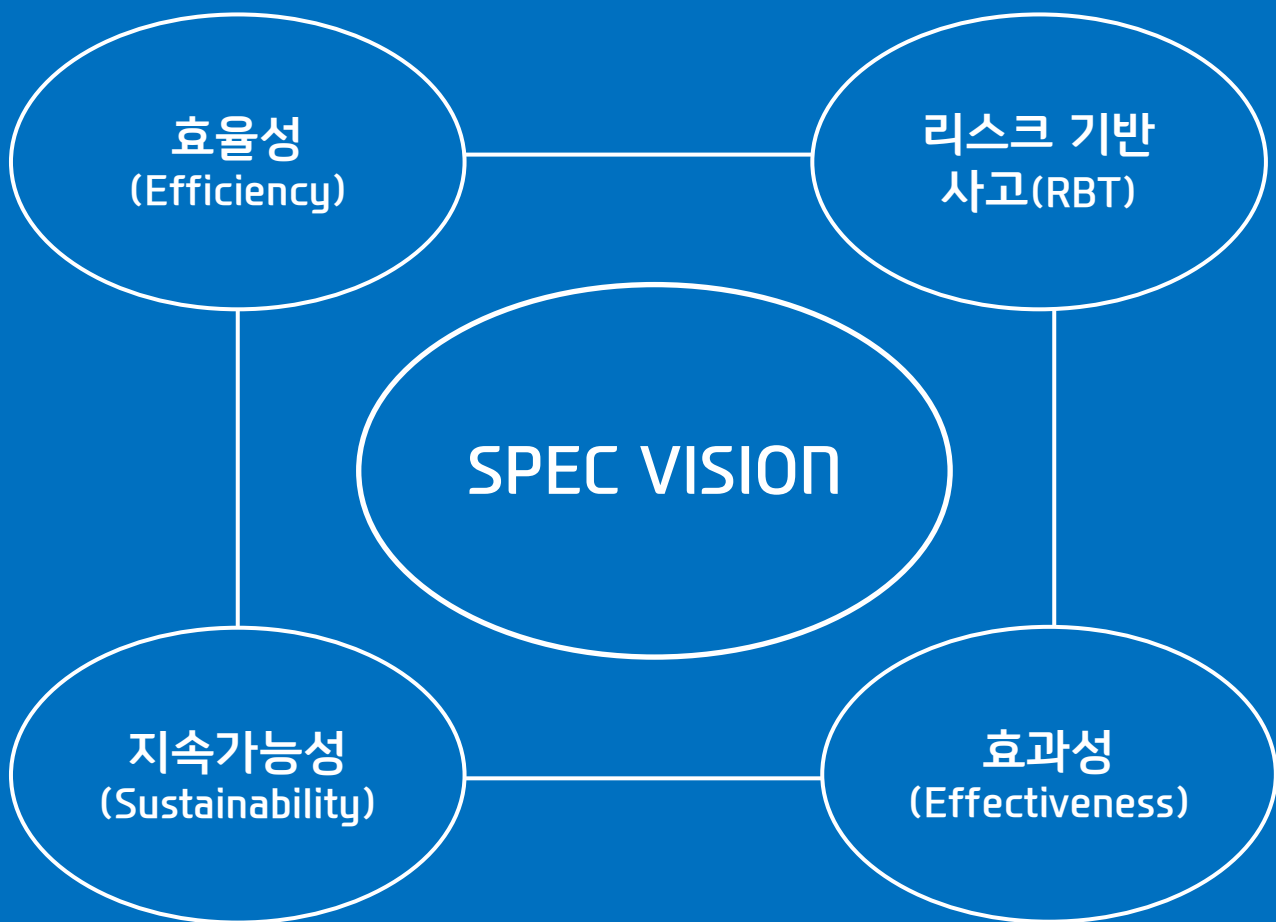

Sigma XL is only a fraction of the price of any statistical product.
And yet it has all the features you need for a top professional.
Quality, education and training can be cheaper.

1. By reviewing powerful analysis as user designed it yourself, allows users to experiment design with familiarity.
2. Measurement system analysis by confidence interval.
3. Estimation and testing of coefficients, metric values – Automatically calibrate against the normality, variance, mean and median
It provides rule-based yellow highlighting to help users with output commentary.
4. If the P-value is low, it is highlighted in red to indicate that the result is significant.
5. Powerful statistical programs stored in Excel are simple and easy to use.

Through the management system certification,
SPEC gives value to the customer

Operating policy

SPEC establishes, operates and maintains an independent and effective certification system for the certification of international and national management systems and provides fair and reliable services to all customers.

- Consider the Clients first.
- Discharge the responsibility of certification in society.
- Progress together with clients.
- Think of the clients one more time.

Continue to train experienced and resources for certification services and service maintenance.

We also provide useful information to customers.

Why SPEC?

Professional

With the highest level of expertise and practical experience in science and technology SPEC help you to use the professional engineer as your management system.

- Operated by professional engineer
- Professional engineers in each industry participate in the audit
- Blend unique technology and management system
- Focus on corporate competitiveness

Differentiation

Provide differentiated certification services

- Perform audits from the perspective of customers and stakeholders
- Professional engineers participate in the audit team

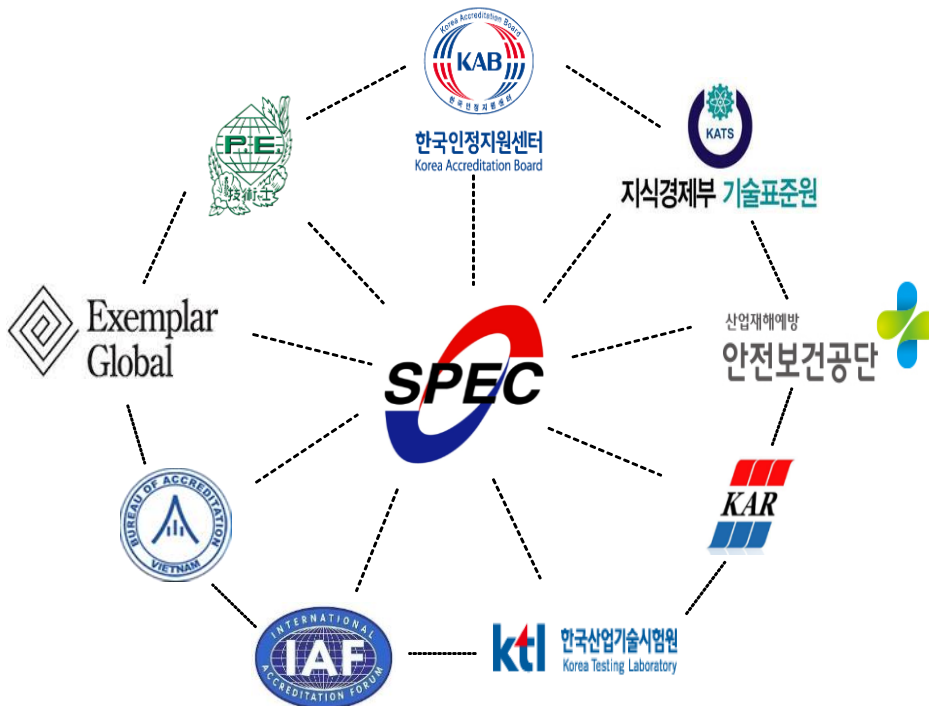

Reasonable

Focus on improving competitiveness of companies

- Emphasis on Effectiveness and Efficiency
- Process Approach
- Risk-based thinking (RBT)
